Precious Cargo Shipper

Keep your customers happy

The better way to ship bottles

Protecting your precious cargo during handling and transport is vital to your business. No damage, no breakage – that is what you need. But corrugated packaging often falls short.

Now there is a superior, cost-effective alternative for shipping bottles. The Beaver Plastics Precious Cargo Shipper is manufactured from expanded polystyrene (EPS) using a proprietary molding process. The Precious Cargo Shipper is strong, lightweight, moisture-resistant and customizable to match the shape of your cargo. It is engineered to provide maximum strength and buffering with a minimum amount of raw materials.

DISCOVER THE SAVINGS

Precious Cargo Shippers make economic sense for a wide variety of operations. This proven technology has already provided safe passage for millions of bottles worldwide. Your company can gain the same advantages:

Strong and rigid. The Precious Cargo Shipper will not deform or sag. The EPS plastic absorbs vibrations and reduces bounce.

Water resistant. Bottles can be packaged in damp or in high-humidity storage with no adverse effects on the holder. The Precious Cargo Shipper will not become damp and collapse.

Simple assembly. The product has two components: top and bottom. There's only one way to put the bottle in.

Easy to maintain. The Precious Cargo Shipper is impervious to odors and easy to clean.

Customizable. For unique shapes, the Precious Cargo Shipper can be molded to match your bottle shape. (Minimum order required.)

A GREEN SOLUTION

The Precious Cargo Shipper is a sound environmental alternative to corrugated packaging. All Beaver Plastics products carry the recycling code for polystyrene and can be recycled at the appropriate facilities.

QUALITY MAKES THE DIFFERENCE

Since 1967 Beaver Plastics has been producing high-performance, engineered products from EPS. Our products are used in the horticulture, silviculture, construction and packaging industries. Widely recognized as the quality leader in all our markets, Beaver Plastics was the first manufacturer of expanded polystyrene products in North America to achieve ISO9001 certification.

Beaver Plastics is the name you can trust when it comes to the handling and transport of precious cargo. The Beaver Plastics Precious Cargo Shipper is designed to provide superior protection. You will have the confidence that your cargo will arrive in perfect condition.
