

## Industrial strength leak control with Drip Trays from Beaver Plastics

Leaks, drips and spills of petroleum products can be an occupational hazard, a clean-up headache and a regulatory nightmare. Now you can have superior leak control by using premium Drip Trays from Beaver Plastics.

Beaver Plastics Drip Trays are made from ABS, an extremely versatile thermoplastic known for its chemical and stress resistance. Our expert technicians can form the tray to match your required coverage area, no matter how large.

Beaver Plastics Drip Trays are the work-tough solution for catching leaks and drips in the work area:

- Resistant to petroleum products
- Resistant to inorganic salts, alkalis and many acids
- Tough and durable
- Maintain strength and resilience down to -40°C
- Withstand temperatures up to 120°C without deforming

Beaver Plastics Drip Trays shown next to a standard 40 gallon barrel.

### Experience the Beaver Plastics difference

Since 1967, Beaver Plastics has produced high-performance, engineered products made from plastics. Our expertise and experience are your guarantee of an exceptional drip tray:

- Engineered to match the footprint of your area of concern
- Manufactured with premium ABS plastic
- Unparalleled attention to quality and customer service

### Tough, chemical resistant and weather resistant.
